SERVICES AVAILABLE

Assessment and Planning

A child's development is assessed by his or her own parents and our staff members from various fields. These include early childhood/special education, occupational therapy, speech/language therapy and physical therapy. If a child is found eligible, a program plan is written, together with the parents, to help meet the child's specific needs.

Service Coordination/Case Management

PE-ID offers families help in using and coordinating a wide variety of specialized services.

Home Visits

A transdisciplinary team member regularly visits the home. Together with the parents, they work to build the child's skills.

Infant & Toddler Connection of the Rappahannock Area

RAPPAHANNOCK AREA
COMMUNITY SERVICES BOARD

Service Area: Caroline, Fredericksburg, King George, Spotsylvania & Stafford

DOLLARS & SENSE

Parent Education-Infant Development is a program of the Rappahannock Area Community Service Board. Developmental screening is free and initial assessments are provided at no cost to parents. Families in the program pay fees based upon their ability to pay and no one is denied service due to an inability to pay. If a family does have insurance, the company is billed for services. **PE-ID** is also funded in part by state and federal funds.

WHO WE ARE

Parent Education-Infant Development Program is an Early Intervention Program for infants and toddlers with developmental delays aged birth to 36 months and their families who live in the City of Fredericksburg, or the Counties of Caroline, King George, Spotsylvania, and Stafford. **PE-ID** is operated by the Rappahannock Area Community Services Board (RACSB), as part of Virginia's Early Intervention System, the Infant Toddler Connection of the Rappahannock Area.

The **Parent Education – Infant Development Program** believes all children have the right to reach their fullest potential. The purpose of the program is to provide help to parents of infants with developmental delays so further problems can be avoided and delays minimized.

IF YOU ANSWER NO TO ANY OF THESE QUESTIONS...

Please call us.
We're here to help.

It could be the most important step you'll take for your child's future.

DOES YOUR CHILD?

The following is a list of responses to be expected by certain ages. This list is general and should be used only as a guide for the possibility of potential developmental delays. If you have concerns, please call our office.

0-3 Months Does your child respond to loud noises, demonstrate a social smile, coo, visually follow an object, and begin to hold head erect?

3-6 Months Does your child recognize and respond to his/her name, use vowel-like sounds, hold and explore toys and roll over?

6-12 Months Does your child babble and begin to speak his/her first words such as "ma-ma" and "da-da", sit unsupported, follow simple requests, transfer toys from hand to hand, and wave "bye-bye"?

12-18 Months Does your child follow simple commands, begin to name objects, walk alone, scribble with crayon, and begin to drink from a cup?

18-24 Months Does your child recognize pictures in a book, point to body parts, begin to use two word sentences, put shapes in a shape sorter, kick and throw a ball, and eat table food independently?

2-3 Years Does your child follow 2 to 3-step unrelated commands, understand and use 2 to 4-word sentences to communicate family names, action, common objects, locations (i.e., in, out) and attributes (i.e., big, hot, dirty), use pretend play, and draw simple pictures?
